Please note that it is an estimated amount of cryptocurrencies you can get. The calculations are based on the current pool fee, 0% bad shares and doesn't account for orphan blocks or uncles.. Calculate the profit from mining Equihash-based currencies (Zcash, Bitcoin Gold) on MinerGate.. **WHAT IS BLOCKCHAIN?** A blockchain is a digital ledger recording cryptocurrency transactions, maintaining records referred to as 'blocks' in a linear, chronological order.

WHY USE A BLOCKCHAIN? Using a blockchain ensures security and manages digital relationships as part of a system of record.. Zcash supports both shielded and transparent addresses, giving users the option to send Zcash publicly or privately.. Enter your mining rig's hash rate and the CoinWarz Bitcoin mining calculator and Bitcoin profit calculator.. Users tend to prefer confidentiality, which is better achieved through a centralized database.

HOW DOES ZCASH COMPARE TO BITCOIN? Zcash allows users to send public payments, as with Bitcoin.. Your profit depends on network difficulty, block reward, transactions amount and fee.. Performance also differs, as a centralized database is able to compute information faster than blockchains.. Exchange rates are provided. Calculation is based on the following formula: $\text{Reward} = ((\text{hashrate} * \text{block_reward}) / \text{current_difficulty} * 2^{13}) * (1 - \text{pool_fee}) * 3600$.. Blockchains are under a decentralized control, whereas a centralized database creates a dependent relationship between users and administrators.
